RE: Reclamation of Mined Lands  
Mineral Lease ML 44911-BSLS  
DOGM Permit # S/003/017, Green Beetle Quarry

Dear Mr. Bown,

Mineral Lease ML 44911-BSLS expired on August 31, 2000. Lands which were mined on the hilltop in the Northeast quarter of the leasehold have been regraded by Lessee, but not mulched and reseeded. The approval originally given by Lessor for Lessee to mine the lands within the leasehold was conditioned upon Lessee's commitment to reclaim the mined lands. It is too late in the season to reseed the disturbed areas, but this spring is the best time to prepare the ground for reseeding in the fall.

**The School and Institutional Trust Lands Administration hereby requests the Lessee under ML 44911 to immediately, within the next thirty days, blanket the acreage disturbed by Lessee's mining operations on the hilltop in the E2SE4SE4, Section 36, T11N, R16W, SLB&M, with a suitable mulching material to a thickness of at least one inch. (Reseeding of the disturbed area must be performed in the fall, 2001).**

The site will be inspected at the end of said thirty days. Failure of Lessee to comply with this reclamation request may result in Lessee's forfeiture of Surety Bond #900633228. Please contact me if you have any questions in this matter.

Sincerely,

John T. Blake  
Mineral Resources Specialist
